

## CABINET LOCK WITH TOUCH KEYPAD

### PRODUCT FEATURES

- **Password Management**  
Supports 4–10 digit passwords for flexible and secure access.
- **Can store up to 8 passwords:** 1 admin, 5 guest, and 2 manager passwords. Passwords can be used in Independent mode as well as Public mode
- **Card Technology:** RFID Mifare Technology , Frequency 13.56Mhz IC cards
- **Low-Battery Warning:** Audible and visual alerts notify users when battery power is low, ensuring uninterrupted use.
- **Anti-Pry Alarm:** Protects against tampering by triggering an alarm if someone attempts to force the lock.
- **Secure Access Control:** Each password is independent, preventing unauthorized entry and maintaining accountability for multiple users.
- **Automatic Rebound Function:** No door handle needed; the lock rebounds automatically after opening, locking smoothly when the door is closed.
- **Durable and Reliable:** Built with high-quality materials for long-lasting performance in high-traffic or public areas.
- **Flexible Applications:** Compatible with wooden, metal, or plastic lockers and cabinets of various sizes.

### Technical Specification

Model	F-C04
Material	Lock Panel - Zinc alloy; Lock body - ABS
Card Type	13.56Mhz Mifare / IC
Unlock Method	Passcode + IC Card
Working voltage	DC6V (4pcs AAA alkaline batteries)
Static current	<15uA
Application	Storage cabinets, Gym Lockers, Fitness, School, Sauna room Swimming pool
Color	Black
Emergency Opening option	USB Type C
Latch Bolt Length	14mm
Latch Bolt Width	14mm
Size	125* 54.6 * 31 mm

# F-C04
