F-E612

SMART CABINET LOCK WITH TOUCH KEYPAD

PRODUCT FEATURES

- **Touchscreen Numeric Interface:** Simple, modern keypad utilizing numbers 1 through 5 plus an "OK" confirmation key for intuitive code input.
- **Dual Operation Modes**
  a. **Private Mode:** Perfect for personal use where a permanent, single password is repeatedly reused (e.g., home wardrobes, office drawers).
  b. **Public Mode:** Ideal for shared or temporary spaces where a user enters a single-use code that clears immediately after opening, leaving it ready for the next person (e.g., gym lockers, spa cabinets)
- **Anti-Peep Password Protection:** Allows users to enter random digits before or after their actual master code to prevent onlookers from stealing the combination.
- **Power & Safety:** Uses an internal button cell battery, warns you when power is low, and includes an emergency USB or contact port on the front to jump-start the lock if the battery dies.
- **Standard Fit:** Mounts into a standard 16mm to 19mm circular cutout on furniture doors ranging from thin metal up to 30mm thick wood.

Technical Specification

Model	**F-E612**
Material Lock Panel	**High-grade Zinc Alloy**
Keypad	**Acrylic**
Operation Modes	Public and Private mode
Unlock Method	Passcode
Primary Power Supply	3V button battery (CR2032, not included)
Application	Storage cabinets, Gym Lockers, Fitness, School, Sauna room Swimming pool
Color	Grey
Emergency Opening option	Integrated Micro-USB
Touchpad Dimensions	(Height) 35 mm, (Width) 37 mm
Cylinder Latch Dimensions	16mm–19mm installation holes , with cylinder lengths 30 mm
Size	92.5 x 37 x 14.5 mm
